

**ACQUIRED BRAIN INJURY PROGRAM
RESEARCH RELEASE**

The Coastline Acquired Brain Injury Program is considered a “teaching program.” Information gained in our program is often used for research purposes and professional presentations for the advancement of head-injury services. It is understood by the student/applicant and /or responsible party that details from their medical records, rehabilitation course, activities in the program, and/or progress made may be used in research projects and for presentations to professional audiences. It is understood that all information used will be handled confidentially for the personal protection of the student/applicant.

I understand and agree to the conditions specified above and give permission for information in my file to be used for such purposes.
