

Introducing SQuiD

Coastline's online course management system now offers an integrated assessment tool called the **Seaport Quiz Designer (SQuiD), which you can use to create online quizzes, tests, or exams.**

Students do not need separate logins to access quizzes or exams.

Tests may be timed or have no limit.

Test scores are integrated with the Seaport grade book.

Quiz questions can be multiple choice, true/false, short answer, or essay.

Questions/answers may contain pictures, video, audio, and hyperlinks.

Quizzes can be randomized, pooled, and/or weighted.
